

DIGITbrain

D I G I T B R A I N

DIGITbrain project aims to give SMEs easy access to **digital twins**, which consists of a virtual representation of a product, service or process to optimize their management.

The project will empower the European network of digital innovation hubs to implement a smart business model called **Manufacturing-as-a-Service** (MaaS), which will facilitate the cost-effective, distributed and localized production of more specialised products. In addition, the project plans to open two calls aimed at ICT SMEs and manufacturers,

with the aim of showing and validating the project results. In this sense, DIGITbrain will provide access to digital twins that bring agility and innovation to SMEs.

DIGITbrain (GA 952071) is funded by the Horizon 2020 programme of the European Union (EU). It has a duration of 3.5 years and a budget of more than 9 million euros.

Spanish partners

- [PNO Innovation](https://www.pnoconsultants.com/es/) [<https://www.pnoconsultants.com/es/>] - coordinador
- [Instituto Tecnológico de Aragón \(ITAINNOVA\)](https://www.itainnova.es/es/) [<https://www.itainnova.es/es/>]
- [ENIDE Solutions](http://www.enide.eu/) [<http://www.enide.eu/>]
- Inyecciones Montañana
- Technological Corporation of Andalusia (CTA)

Budget and deadline

Budget: € 8.362.386,89

Deadline: 01/07/2020 - 31/12/2023

CTA activity

CTA will organise and execute the two open calls for projects in order to find new experiments to show and validate the project results.

DIGITbrain project will help SMEs to apply digital twins
