

# DIVAx

Download image

The **DIVAx** project aims to help SMEs to develop transnational ICT projects applied to agro-economy.

DIVAx will facilitate the opening to Europe of 'AgTech' SMEs, that is, those that use digital technology applied to agriculture. The project will offer a range of services aimed at increasing your knowledge of the European innovation ecosystem and taking advantage of cross-border funding and collaboration opportunities.

This initiative arises from the H2020 DIVA project, completed in 2021 after financing 134 projects from 180 European SMEs on ICT solutions for the agri-food, forestry and environmental sectors.

DIVAx has received funding from the European Horizon 2020 program through the SmartAgriHubs project, together with 5 other partners from 4 European countries (Spain, France, Portugal and Italy).

## Partners

- Coordinator: Agri Sud-Ouest Innovation (ASOI) [ <http://www.agrisudouest.com/> ] - Francia
- Valorial [ <http://www.pole-valorial.fr/> ] - Francia
