

Transener

CTA is one of the 8 European partners of Tr@nsener project (Interreg-Sudoe), which, with a budget of 1.8 M €, aims to increase the innovation potential of European regions in the field of electricity technologies and to improve the **efficiency of electrical systems**.

The project is led by the French university Toulouse III Paul Sabatier and has a total of 8 partners from France, Spain and Portugal. In addition to CTA, there are 3 other Spanish partners: the Foundation for Energy and Environmental Sustainability (Funseam), the Polytechnic University of Madrid (UPM) and the Center for the Research of Energy Resources and Consumption (CIRCE). The aim of the project (36 months) is to generate synergies between companies, laboratories and technological infrastructures at the service of companies from the three countries, in order to create innovations in the field of energy efficiency.

TR@NSENER project is co-funded by the Interreg Sudoe Programme.

Such programme is implemented in the frame of the territorial cooperation European objective, being known as [Interreg](http://ec.europa.eu/regional_policy/fr/policy/cooperation/european-territorial/) [http://ec.europa.eu/regional_policy/fr/policy/cooperation/european-territorial/] and supported by regional policy funds (European Regional Development Fund (ERDF)).

Budget and deadlines

Budget: 1.965.218 €

Deadlines: July 2016 - July 2019

CTA activity

CTA organises a sensitisation session on acceptability factors. This session will be aimed at the general public or industrial professionals related to the building sector. CTA also carries out communication support and dissemination actions for the project.
