

# What projects do we finance?

We finance R&D business projects which are economically or socially viable in sectors of strategic importance for Andalusia (link a sectores). Projects must subcontract at least 10% of their budgets to public research groups included in Andalusia's 2020 Plan for Research, Development and Innovation, except in the case of feasibility studies.

We finance projects using our own funds and also help to seek additional funding (CDTI, IDEA Agency, EU - regional, national and European programmes).

We offer an effective project management procedure: rapid, flexible, independent and results-oriented decision making process. All projects are subject to external evaluation by advisors certified by the national accreditation body, ENAC, and organisations with proven experience of UNESCO codes.
